PS: Now having recording problems (using PVR), sometimes can record sometimes cannot; a lot of recorded programs are lost for no reason.. Seems to happen when I try to go to Home>Planner to access recordings Ipod Software Update ErrorI'm on PVR, no switcher, have HD, have about 20 recordings (episodes, not movies, mostly non-HD).. Hi, thanks for your response My TV model is NEC PX-50XM3, it comes with DVI-D 24-pin HD input instead of HDMI.. Is there an error code? Lastly if you post on here again with that language I will delete you, so grow up.

Hi, thanks for your quick reply! I wish to disagree on your conclusion for the HDMI-DVI connection to view HD.. Contacted Astro and they said this is being experienced by a lot of other customers, and will be resolved with future firmware upgrade.

Pure Engagement BD Batch If after 10 minutes there has been nothing turn the decoder on.. The Box 'Hangs' a lot of time While we are watching tv, the picture 'freezes' and the box displays various numbers, i think this problem is mentioned below me, If u reboot it, like i did, its okay, but only for a limited time b4 it goes into 'hang' mode, i think Astro really needs to fix this problem or their sales of astro byond might fall, is it the problem with the Astro B.. Also, any explanation why the FIFA World Cup HD channels on Byond worked fine? Since even TVs with HDMI inputs are having the same HDCP problems, I would suggest that the issue is with the Byond decoder and not my TV.. Os let me know how that goes I found out that many of the Astro B yond Subscribers face this problem.. There is no blue screen when there is an error, it's black Suggest you claim down and write an email to Astro detailing exactly what is wrong if you are not happy about waiting on a call.

Worried that constant rebooting – I have to do this a lot – will spoil the decoder.

2 things happen, the first more often than the second: 1) Picture freezes and sound continues live, and can reboot at the decoder without switching off at the plug/electricity mains, or 2) black screen, no pic or sound, and have to reboot by switching off at the plug.. Ipod Software Update ErrorThe Alcatel OneTouch Pop Astro, HTC One M9, LG G4, LG G Stylo haven't received the necessary After being on store shelves for just under a week, Verizon Wireless is already beginning to push out a minor software update for the LG Spectrum, a phone.. Otherwise, my Bluray player will not be able to output a signal due to HDCP failure.. Subscribed only 4 mths ago, this is my second decoder (replaced abt a month ago).. I have tried connecting with WDTV, Bluray player and HD laptop via HDMI and receive the HD signal perfectly.. yond box? ( If it is, why so many Astro byond boxes have the SAME problem? ) Or is it a bug that astro havent fixed yet? I hope u can answer this as it might play a big role for Astro byond's popularity within the malaysian citizens. e10c415e6f
